Heart and Soul Project

This project will be built one person at a time, in a sort of "pass the baton" style.

Step 1: ONE person will record ONE part to heart and soul via Bitwig.

Step 2: Person 1 will save the project and then email it to another student to ADD on to it. It is important that the file is emailed, not uploaded to Google.

Step 3: Person 2 will add another part to the track.

Step 4: Person 2 will save the NEW project and then send it to someone new. Etc…

Things that you can add:
- The Treble (melody) part
- The bass part
- Chords
- Percussion
- An improvised or composed solo (in C)
- A melody from another song (see the list in Google Class)

Have fun with it! This will be our first time doing a full class collaborative project!
